

# ARCHIVES of ACOUSTICS

QUARTERLY, Vol. 51, No. 2, 2026

## Research Papers

|                                                                                                                                                                                                      |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| T. SUN, L. CHEN, X. DENG, <i>Construction method of sparse dictionary for multi-order FRFT domain feature fusion</i> .....                                                                           | 235 |
| R. SHARMA, FIROS A., <i>Few-shot transfer for speech enhancement using SEGAN with stability guardrails</i> .....                                                                                     | 249 |
| H. WANG, Z. HUANG, Z. LU, X. HE, T. XU, <i>Causality- and passivity-constrained nonnegative attention for interpretable structure-borne road noise prediction in battery electric vehicles</i> ..... | 267 |
| Q. CHEN, X. YANG, <i>A study of damage mode recognition of polypropylene fiber-reinforced recycled aggregate concrete based on principal components of acoustic emission signals</i> .....           | 283 |
| A. HASANOV, R. HASANOV, E. AGHAYEV, R. AHMADOV, <i>The mechanism of formation of the cutoff frequency in an acousto-optic delay line and some proposals for its measurement</i> .....                | 293 |
| S. HAMOUTA, A. AHRIZ, N. ZEMMOURI, A. MANSOURI, <i>Shaping the soundscape: Exploring the influence of building layout on outdoor acoustic environments</i> .....                                     | 301 |
| J.M. KOPANIA, K. WÓJCIAK, P. GAJ, G. BOGUŁAWSKI, <i>The influence of the surface of ventilation duct on sound attenuation in the airflow</i> .....                                                   | 317 |
| M. PIETRAS, Ł.P. PAWELEC, M. KRZYŻANOWSKA, A. LIPOWICZ, <i>Masculinized or feminized? Discriminant analysis of postmenopausal women's voices</i> .....                                               | 333 |
| A. SIVAN, C. ESWARAN, <i>Indian Sign Language alphabet recognition and speech synthesis using a hybrid deep learning approach</i> .....                                                              | 345 |

## Technical Notes

|                                                                                                                                                                                                                                               |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| S. MACKIEWICZ, Z. RANACHOWSKI, T. KATZ, T. DĘBOWSKI, G. STARZYŃSKI, <i>Modeling of high-speed ultrasonic testing of railway rails in track inspection</i> .....                                                                               | 359 |
| P. NADACHOWSKI, Z. ŁUBNIEWSKI, K. TRZCIŃSKA, R. WRÓBLEWSKI, M. RUCIŃSKA, J. TĘGOWSKI, <i>Semi-supervised learning for sediment classification using convolutional neural networks with digital elevation model and backscatter data</i> ..... | 377 |

## OSA 2025

|                                                                                                                                                        |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| J. DUMANOWSKI, A. PREIS, J. FELCYN, <i>Application of ISO 12913 standard to assess urban soundscapes: A case study on Poznań</i> .....                 | 387 |
| M. PLUTA, <i>The impact of generated and expressive modulation of the synthetic instrument sound parameters on the impression of naturalness</i> ..... | 399 |
| K. WÓJCIAK, J.M. KOPANIA, P. GAJ, <i>Impact of perforated sheet geometry on the insertion loss of absorptive silencers</i> .....                       | 415 |
